If you use a cellphone, Smartphone, BlackBerry, Laptop, PC or wireless PDA for email you already have the equipment you need.

Questions? Read the Automated Reminders FAQ

"As a blind person, I find OnTimeRx phone reminders are invaluable. Twice a day, I am required to take anti-seizure medicine. These calls insure that I take my meds at the same time each morning and evening, which is vital with this kind of treatment. Thank you for your help!"

-- Thair Knoles, Kingsburg, California

"I'd miss a lot of pills without these calls!"

-- K. deJoseph

"Wonderful service. Dad Loves it!"

-- Daniel G.

"These reminders work great - very reliable."

-- Milton S.

What do our happy customers say?

OnTimeRx® for Phone, Email and Pager Reminders

Product Information

Need to take pills routinely? Timely reminders really help. If you've ever forgotten to take your pills (and who hasn't?), our OnTimeRx® reminder service is just what you need.

OnTimeRx® turns ordinary devices into healthcare tools. If you use any phone, Smartphone, BlackBerry, laptop or PC, wireless PDA or pager - That's Great! You already have the equipment you need.

You can send yourself OnTimeRx® Automated Reminders as voice alerts, email reminders or alphanumeric pages.

How does the service work?

Everyone has a phone (cell or land line), so you already have the equipment you need. Our subscribers use our automated calls to remind themselves or an aging parent to take medications, wake up from a daily afternoon nap, or get prescriptions refilled.

Open your secure account for our free trial period and you'll see just how easy it is to set up a reminder message. You can schedule your calls whenever and wherever you need them. Simply answer the phone and you'll hear: "Hello, this is your reminder..." followed by your personal reminder, which has been converted to a voice message.

OnTimeRx® Phone Reminders

Like most people, you probably never leave home without your cell phone. Automated reminders sent to your cell are very effective when you're out and about. If you don't answer the call, it will go to voicemail.

Automated phone calls can also go to your home or work phone - if that's where you happen to be at certain times of the day.

To get your reminders started and to stay on schedule, please click one of the plans below. After you sign-up, you will be able to immediately schedule your first reminder!

- [40 Min. for \\$9.95](#)
- [70 Min. for \\$14.95](#)
- [100 Min. for \\$19.95](#)
- [200 Min. for \\$29.95](#)
- [FREE reminders](#) on your phone for 1 month.

* Each reminder is about 1 minute, if you need more than 1 reminder a day we have a plan to fit your needs.

OnTimeRx® Email Alerts

Automated reminders are very effective via email - if you use "push technology" on a Smartphone, a BlackBerry, or check your email frequently. Use email reminders along with Phone alerts for very

important pills or as backup documentation that you took the pills.

[FREE unlimited email](#) reminder alerts for 1 Month!

[Unlimited email](#) reminder alerts for \$9.95/year!

Works great for BlackBerry and Treo devices or for home email systems.

OnTimeRx® Pager Alerts

Automated pager alerts are very effective in areas where there's no cell service or for people who have to use a pager for work.

[Contact us](#) for details on how this system can work for you on all of these devices.

[FREE unlimited pager](#) reminder alerts for 1 Month!

[Unlimited pager](#) reminder alerts for \$9.95/year!

Pagers work great for assisted living facilities or in rural areas with limited cell phone coverage. Don't have a pager? Rent one for ~\$10/month. [Contact us](#) for information.
