Cover2go Essential Accidental Death Cover

DID YOU KNOW ...

that more than 50% of South Africans are under-insured and most likely do not have enough insurance cover to ensure that their partner, spouse, parents or children are taken care of in the event of their sudden death? Do you fall into this category?

We know that accidents happen all the time. In South Africa young, energetic people die every year as a result of road accidents, drowning and murder - many of these are people who thought they were invincible or would never die young. Of course, nobody expects to die in their 20's, 30's or 40's but mortality is a reality we live with everyday. So, how prepared are you for the unforeseen? Will your loved ones suffer financially when you are no longer around to support them? Have you made adequate financial provision for them in the case of your accidental death?
