Welcome!

Tradenet is a internet application that enables you to provide market information via the web, email and SMS quickly and affordably. The application has been designed and developed by an international team based in Accra, Ghana. They are dedicated to supporting the application, developing new features and providing integration services to your current system. It consists of the following types of content:

- » **prices**
- » **news** stories
- » buy & sell **offers**
- » files & **documents**
- » **contacts** database
- » **forex** rates

The goal is to put more information into the hands of the producers and traders, making the market more transparent and efficient, and assisting stakeholders to make decisions about when to plant, what to grow, who to trade with, when to sell, and for how much.

It is also a powerful analysis tool that enables participants to generate historical and comparison charts and data for price history.

trading information via sms, fax, web, radio
